

HalfLytely and Bisacodyl Tablets Bowel Preparation for Colonoscopy

This prep is administered orally. You should start a clear liquid diet the day of taking this prep. Do not take any antacids 1 hour prior to starting the prep.

You will need a prescription for this prep which the doctor will give you at your office visit.

1. Swallow all 4 bisacodyl tablets with water (do not chew or crush them) at noon.
2. Your first bowel movement should occur in 1 – 6 hours after taking the bisacodyl tablets.
3. Wait for a bowel movement or maximum 6 hours then drink an 8 oz. glass of your solution of HalfLytely every 10 minutes until all of the solution is gone.
4. A watery bowel movement should occur in about 1 hour after drinking the solution.

Preparing the solution

1. Fill the container with lukewarm water.
2. Replace the cap and shake until dissolved.
3. You can then refrigerate for up to 48 hours.

If there are any questions or concerns, please call our office.
